

Client requirements

In summary, the client requires a platform that allows users to upload textual data as well as artefacts which comprise their portfolio. Interaction between users is also a necessary requirement. The portfolios must be searchable by prospective employers.

Functional Requirements

- User accounts
- Show personal statement, education background, work experience and project experience
- Users should be able to comment on others' posts
- Users should be able to send private messages to each other.
- Users should be able to upload artefacts in the form of videos, photos and other attachments.
- Users should be able to use the search bar to find specific items.

Non-functional requirements

- Intuitive user interface
- Secure
- Admin access to remove offending content
