Retrospective

What went well

Item	How can we do more of this?
Successful demo with the project supervisor, most bugs were successfully identified and eliminated in internal testing.	Maintain our pace of pushing out features while rigorously testing them. (We will do more testing in sprint 3)
All attended meetings frequently	Make sure each member is notified before meeting
Efficient and close teamwork (lots of tiny meetings were held frequently)	Maintain open lines of communication, keep encouraging team members to post about what they are working on in the group chat.
Using GitHub properly: 1. Code is always reviewed before merging 2. Everyone works independently on their own branch for a particular feature.	Encourage discipline in using Github. Ensure code is reviewed promptly to incentivize usage of PRs.

What could be improved

Item	How can we resolve this in future?
Some bugs were inadvertently introduced while attempting to resolve merge conflicts	Be careful when editing shared code, adhere to the testing protocol before pushing changes.
Some edge cases were found in the last minute before the demo.	Focus more on testing in sprint3 to eliminate bugs.
The last-minute rush to finish the demo	Ensure tasks are completed ahead of time to leave time for proper testing prior to any future launch.
Team members were not always aware of the technical improvements that other team members had made to the code.	Set aside time to discuss code reviews during team meetings.
