Sprint2 review

Basic info

Date	2020-10-2
Location	zoom

Attendence	all & product owners
Absent	none

Degree of completion (base on the User stories)User Stories

What is done:

section	id	description
Portfolio Viewing	1	view students portfolio
	2	Search
interacting with other users	1	edit/add/delete Content
	2	upload artifact
	3	upload past
	4	upload personal statement
Authentication	2	sign up
	3	sign out
	4	sign in
interacting with other users	1	sending message

what haven't been done:

section	id	description
Portfolio Viewing	3	see the number of views
interacting with other users	2	comments will be done in sprint 3
Authentication	1	reset the password, this function is unnecessary so far since we log in with google, GitHub or Facebook
	5	censor users posts, we can delete illegal content for database directly
Privacy	1	visibility will be don in the sprint 3

	4	1	editing text right below the profile and click save	yes	yes	the personal statement was upload
Authentication	2	1	Click the signup button and choose a preference way	yes	yes	the new account was created
	3	1	Click the logout button	yes	yes	the user is logged out and all function is no longer useable
	4	1	Click the login button	yes	yes	log in successfully and all the stuffs are as same as the last time login

Product owner suggestions:

1. Adding more login options, like mail
2. The website should redirect the user to their profile page as soon as they log in
3. User can upload their CV

Product owner overall comments:

Everything is extraordinary.
